10th WGIN Stakeholders Meeting 27th November 2012

The Defra Crop Genetic Improvement Networks

Announced July 2002

Dr Donal Murphy-Bokern

Arable Crop Sciences & Pesticide Safety Unit

Science Directorate

Defra

defra
Department for Environment Food and Rural Affairs

Overall Objectives

To recreate the best of the past

- **Each Crop Genetic Improvement Network =**

  Virtual Plant Breeding Institute

- **To use crop breeding for the sustainable development of the arable sector**

- **To connect public sector science to the private sector**

Networks established

- **Wheat (WGIN)**
- **Oilseed rape (OREGIN)**
- **Short rotation coppice (BEGIN)**
- **Pulse crops (PCGIN) 2005**
- **Miscanthus**
- **Oats**
- **Leafy Vegetables (VeGIN) 2009**

defra
Department for Environment
Food and Rural Affairs

The longer-term vision

- A strong crop breeding sector deploying the best technologies science can offer

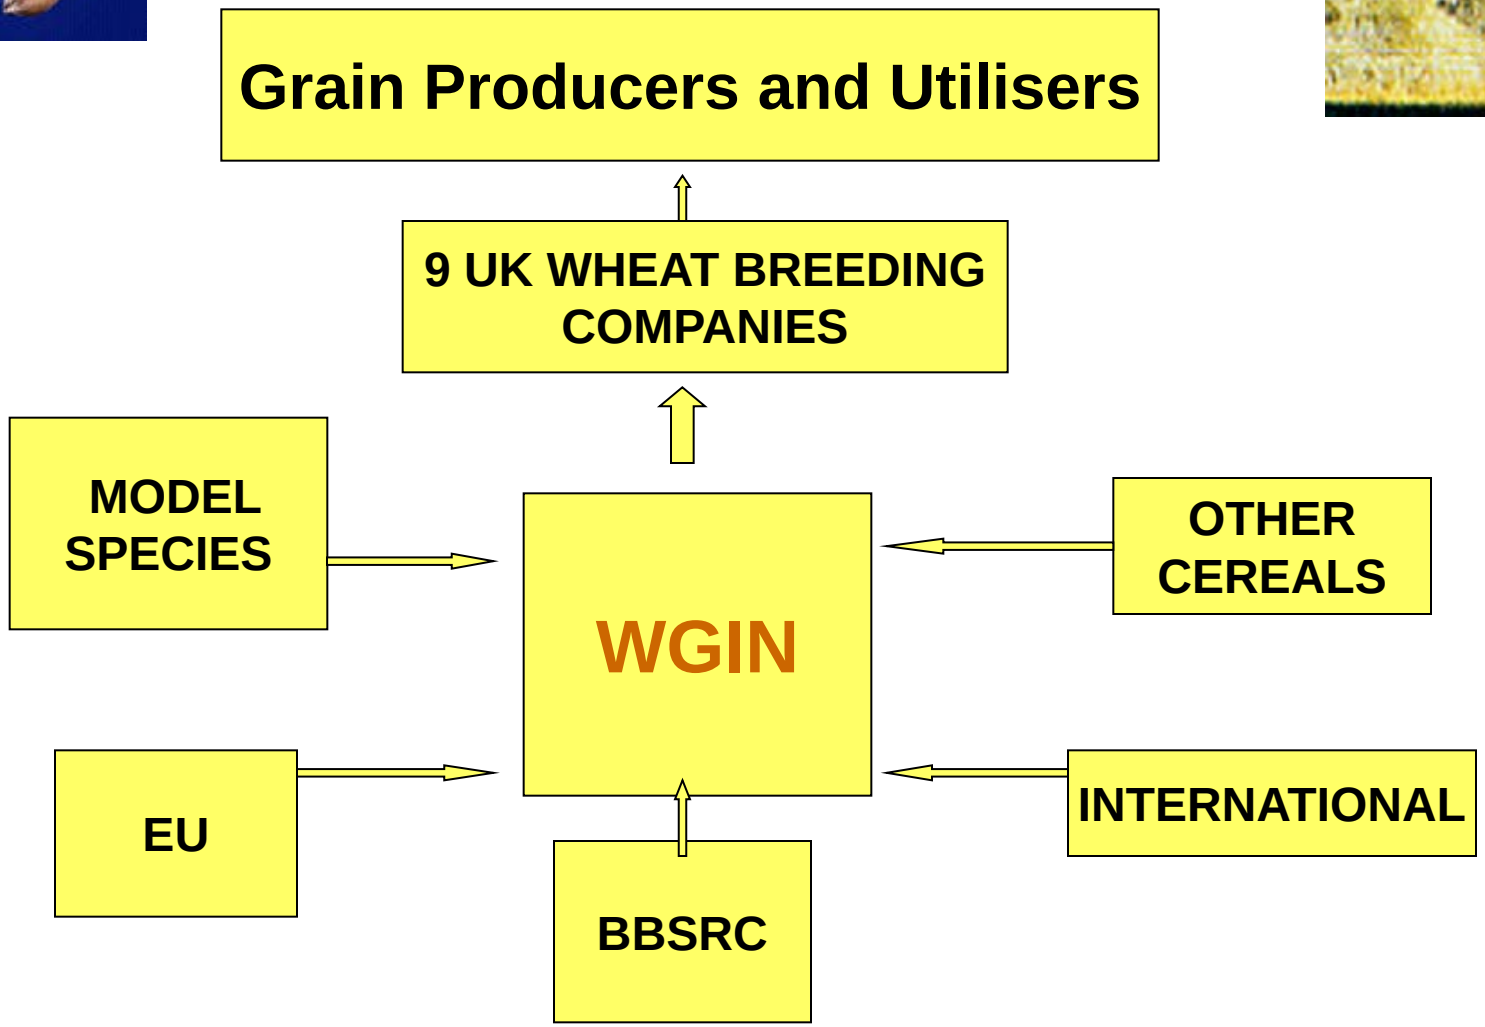
- A strong strategic and applied research base competing effectively for resources

- A strong base for international partnerships

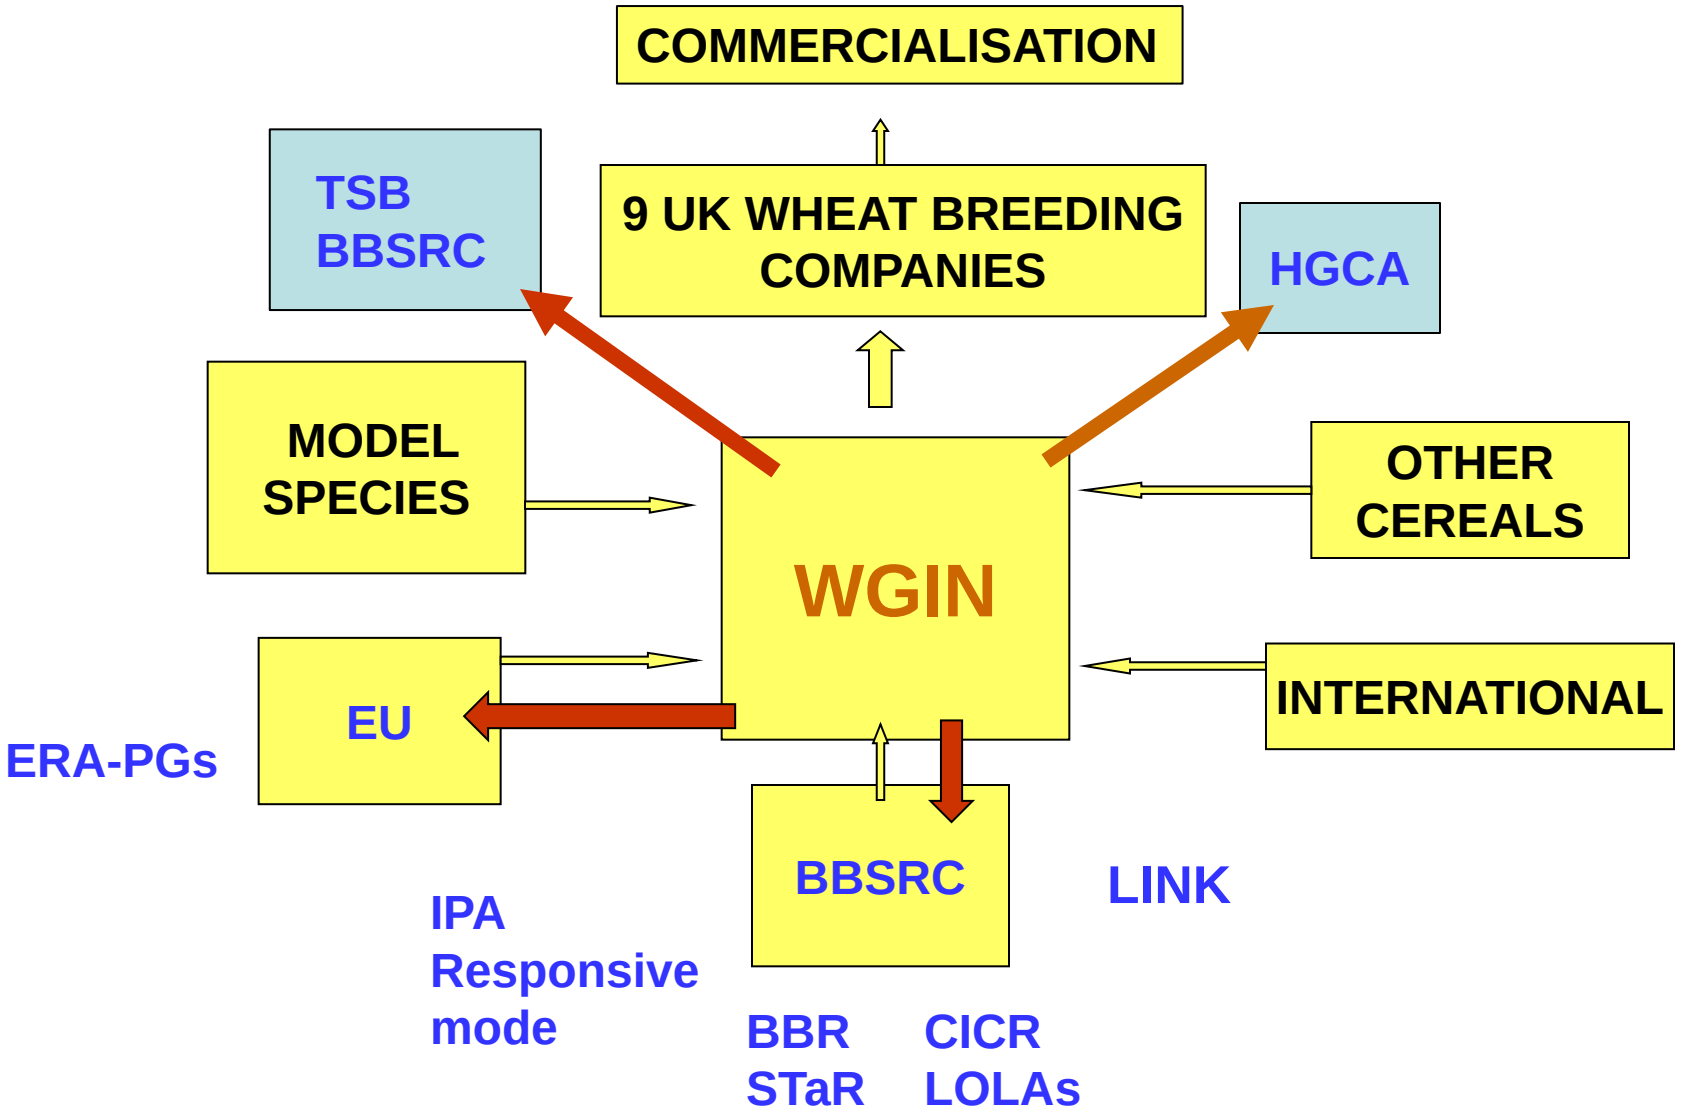
- More resource efficient and productive crops

defra
Department for Environment
Food and Rural Affairs

The Defra WGIN



The modest WGIN funds would attract additional funds to wheat research by other sponsors



Projects of 5 years duration

The WGIN 1 project (2003 – 2008) - £1.80 million
The WGIN 2 project (2008 – 2013) - £1.95 million

WGIN 2 project – funded partners

John Innes Centre
University of Nottingham
Rothamsted Research
+ 2 pilot projects (1 yr / 2 yr)

Mission statement - WGIN 2008 to 2013

Improving the environmental footprint of farming through crop genetics and targeted traits analysis

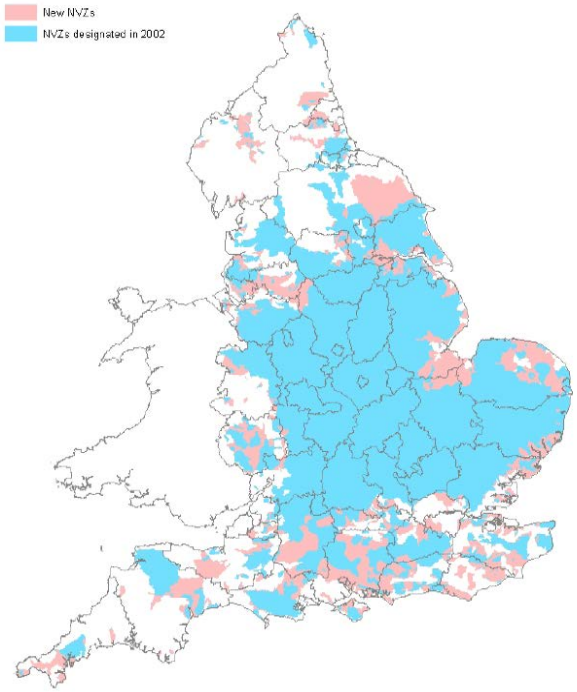
Defra's current policy priorities addressed by WGIN

1. **Support and develop British farming and encourage sustainable food production**

defra
Department for Environment Food and Rural Affairs

Defra's current policy priorities addressed by WGIN

2. Help to enhance the environment and biodiversity to improve quality of life



Increase in England of Nitrate Vulnerable Zones (NVZ) due to arable activities 2002 (blue) to 2009 (pink)

defra
Department for Environment Food and Rural Affairs

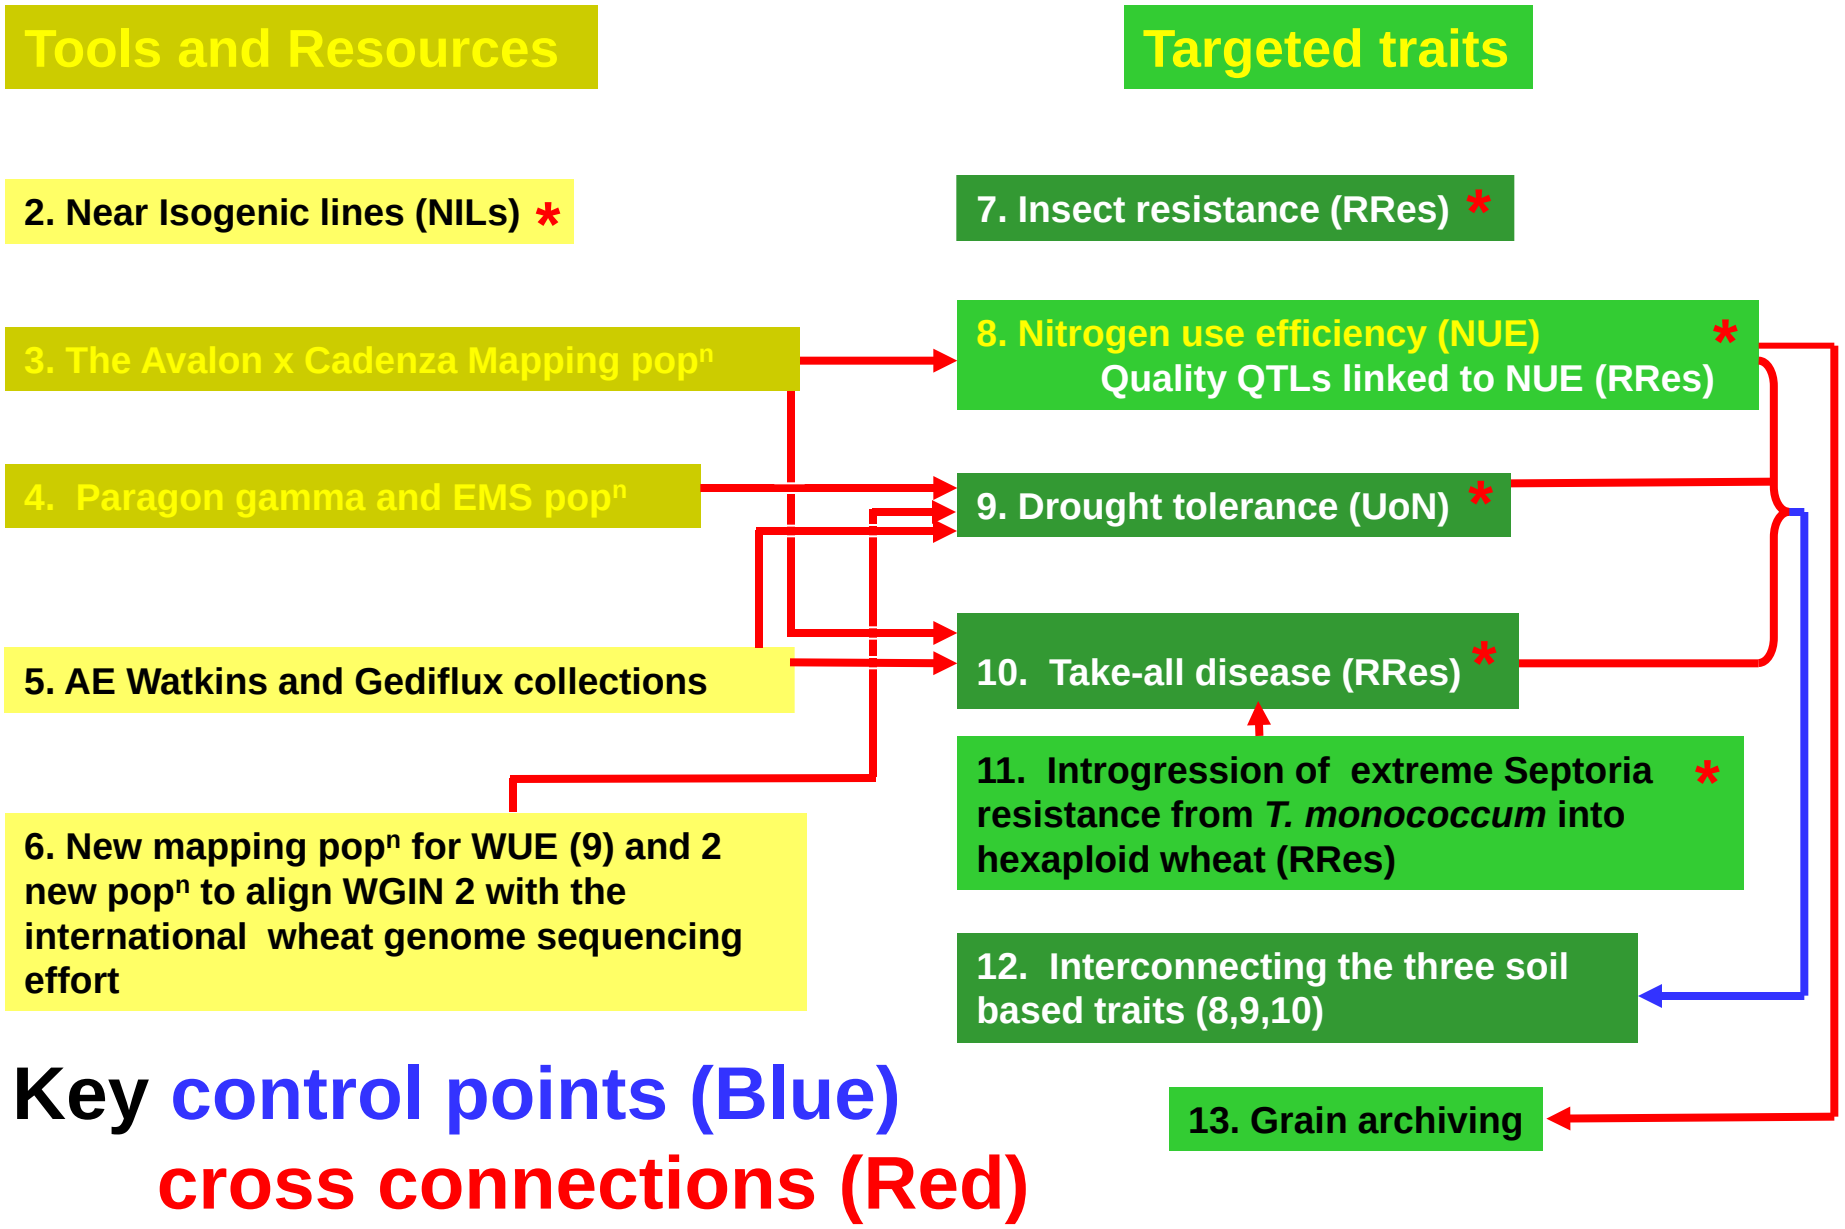
Wheat Genetic Improvement Network (WGIN) 2008-2013

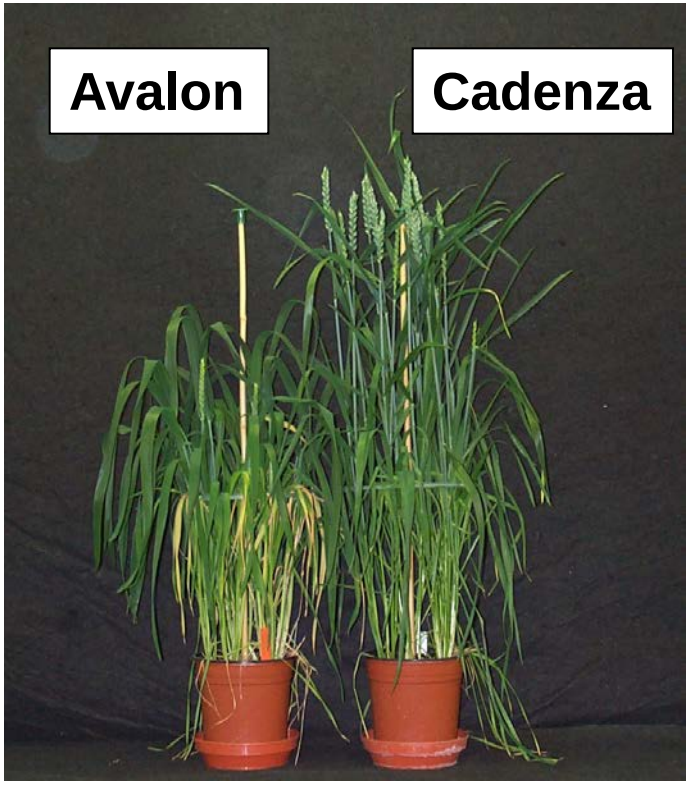


Genetic mapping and marker development

- **Establish a reference UK mapping population**

Avalon x Cadenza -

203 double haploid lines



- **Switch to ‘within the gene’**
  KASPar molecular markers

- **Extended A x C population for fine mapping**

Avalon x Cadenza – Near isogenic lines (NILs)

Large plot trial 2012/2013 – 3 reps

QTLs for different traits

Avalon Background	Cadenza background
225 No of lines	342 No of lines

Simon Griffiths, JIC

Characterisation and provision of genetic resources

The AE Watkins spring and winter wheat collection (JIC)

1930s collection from markets in 32 countries

Seed now available for > 1000 'purified' lines

Represents germplasm never used in UK wheat breeding programmes

Simon Griffiths

Trait identification

1. Improved nitrogen use efficiency (NUE)

2. Grain quality (QTLs) linked to NUE

3. Improved water use efficiency (WUE)

Consecutive years of field trials

Malcolm Hawkesford, RRes

John Foulkes, U Nott

Diversity NUE trial history

Trial	Year	Varieties (core of 9)	N-levels	kg N/ha	
1	2004	32	4	0,50,200,350	Blackhorse
2	2005	20	2	0,200	Fosters

Return to Genetic Resources

Genetic Resources Unit

The Centre is custodian of a number of key germplasm collections which serve academic, industrial and non-industrial groups both within the UK and internationally. They are the subject of research in their own right as well as being involved in a range of collaborative programmes. The collections housed within a purpose built facility maintained at 1.5 ^{0}C and 10%RH with some 600m^{3} of storage capacity.

Material from the collections is available on request to research, academic and commercial communities subject to availability. A material transfer agreement is required before seed is released. Please email for details of the agreement.

For further information relating to the collections please contact: Mike Ambrose
John Innes Centre, Norwich Research Park Colney Lane, Norwich, NR4 7UH.

Welcome to WGIN 2nd Phase (2009-2013)

Defra Wheat Genetic Improvement Network - Improving the environmental footprint of farming through crop genetics and targeted traits analysis

Background

The UK government is committed to more sustainable agriculture but this vision is facing an ever expanding range of environmental, energy and climate change challenges. Wheat is grown on a larger area and is more valuable than any other arable crop in the UK. Established in 2003, the Wheat Genetic Improvement Network (WGIN) arose directly from a realisation in the early 2000s that over the preceding two decades there had been a widening disconnection between commercial plant breeding activities and publicly funded plant and crop research. The overall aim of WGIN is to generate pre-breeding material carrying novel traits for the UK breeding companies and to deliver accessible technologies, thereby ensuring the means are available to produce new, improved varieties. An integrated scientific 'core' which combines underpinning work on molecular markers, genetic and genomic research, together with novel trait identification, are being pursued to achieve this goal.

BSPB promoting innovation

site guide

The site is grouped into the following four sections:

ABOUT - for general information about WGIN, including news items and contacts.
INFORMATION - for more detailed information about WGIN, including reports and information tools.
RESOURCES - for experimental resources and research related tools
STAKEHOLDERS - for information on the Stakeholders Forum

Please use our interactive dropdown menus, the side menus, or the link tracker to navigate the site.
--see site-map for overview

RECENT UPDATES
OLD Site - The old site is still available here.

Disclaimer: WGIN is a publicly funded project and the data and resources it generates are freely available to the research community, providing that the use of any WGIN data and resources are acknowledged.

Soon to include a dedicated DATA section

Accessible via the MONOGRAM website

Economic impact of WGIN

Special focus Newsletter May 2008

- £4.3 M new grants + £2.95 M existing grants

The cost of WGIN 1 was £1.8 M over 5 years

2nd WGIN project impact audit done in late 2011

- 20 new projects described in Nov 2011 Newsletter
- £15 M new grants

14 projects partially industry funded

BBSRC, HGCA, Defra, Technology Strategy Board, Scottish Government, EU Lawes Trust, Rothamsted International, John Oldacre Foundation

+ many PhD student projects

The cost of WGIN 2 is £1.95 M over 5 years

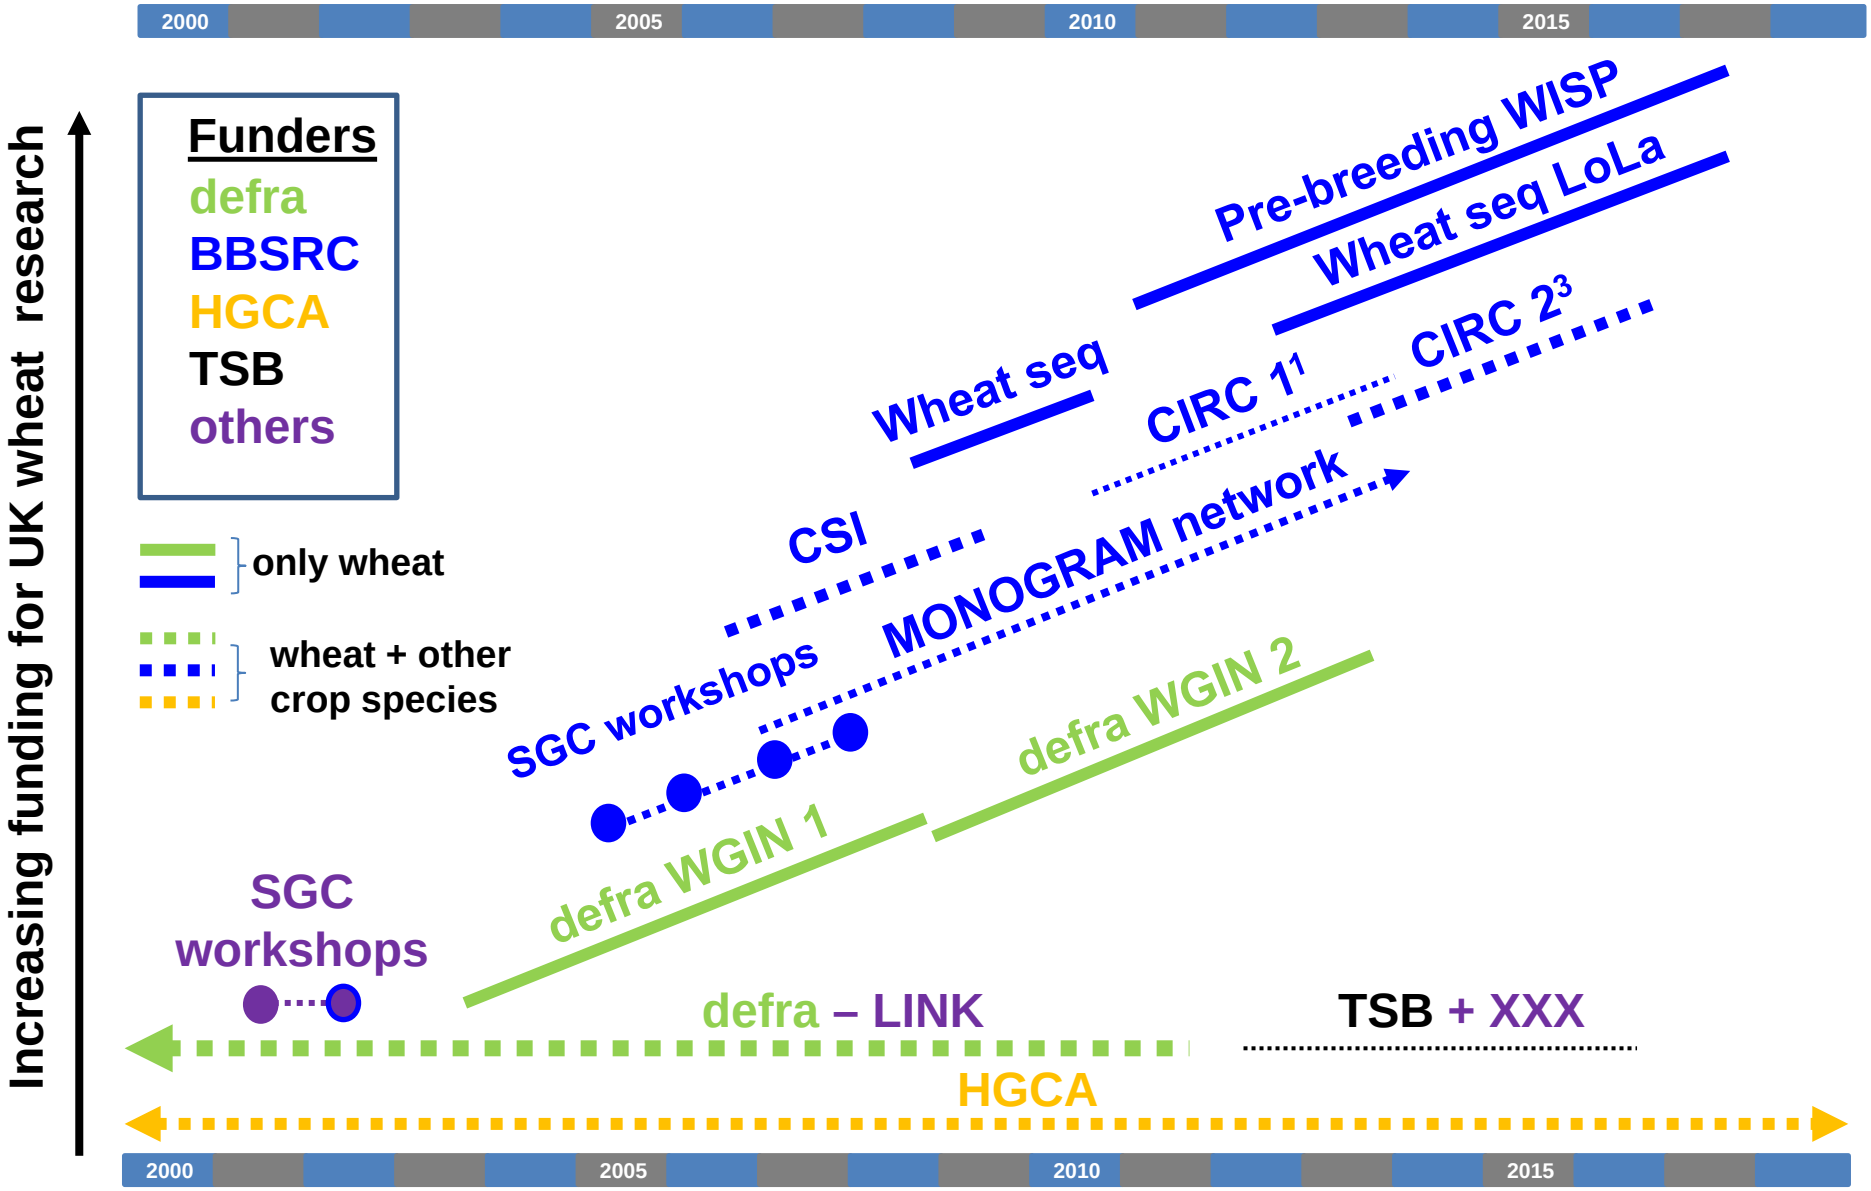
The relationship between WGIN and the major funding initiatives supporting UK wheat research (2000-2017)



The WGIN disclaimer

WGIN is a publicly funded project and the data and resources it generates are freely available to the research community, providing that the use of any WGIN data and resources are acknowledged.

In grant applications as well as final publications

We developed in early 2010 : A generic statement on data and resource use by others

Please use this statement and inform us of all successful activities

Three Defra's current policy priorities addressed by WGIN

1. **Support and develop British farming and encourage sustainable food production**

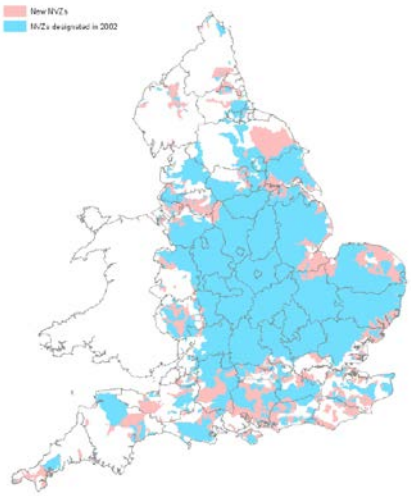
   Help to enhance the competitiveness and resilience of the whole food chain, including farms and the fish industry, to help ensure a secure, environmentally sustainable and healthy supply of food with improved standards of animal welfare

defra
Department for Environment Food and Rural Affairs

Three Defra's current policy priorities addressed by WGIN

2. Help to enhance the environment and biodiversity to improve quality of life

Enhance and protect the natural environment, including biodiversity and the marine environment, by reducing pollution, mitigating greenhouse gas emissions, and preventing habitat loss and degradation



Increase in England of Nitrate Vulnerable Zones (NVZ) due to arable activities 2002 (blue) to 2009 (pink)

defra
Department for Environment Food and Rural Affairs

Three Defra's current policy priorities addressed by WGIN

3. Support a strong and sustainable green economy, resilient to climate change

Help to create the conditions in which businesses can innovate, invest and grow; encourage businesses, people and communities to manage and use natural resources sustainably and to reduce waste; work to ensure that the UK economy is resilient to climate change; and enhance rural communities
